

- Fatty acid biosynthesis (odd-chain)
- Transport reactions
- Fatty acid activation (cytosolic)
- Omega-3 fatty acid metabolism
- Fatty acid elongation (even-chain)
- Cholesterol biosynthesis 3 (Kandustch-Russell pathway)
- Formation and hydrolysis of cholesterol esters
- Fatty acid elongation (odd-chain)
- Estrogen metabolism
- Retinol metabolism
- Vitamin D metabolism
- Vitamin E metabolism
- Terpenoid backbone biosynthesis
- Pantothenate and CoA biosynthesis
- Ubiquinone synthesis
- Glycerophospholipid metabolism
- Cholesterol biosynthesis 1 (Bloch pathway)
- Acylglycerides metabolism
- Sphingolipid metabolism
- Aminoacyl-tRNA biosynthesis
- Fatty acid biosynthesis
- Phenylalanine, tyrosine and tryptophan biosynthesis
- Fatty acid oxidation
